The cost of reprocessing reusable Laryngoscopes
Reusable Laryngoscope Utilization Leads to:
- An average cost per intubation of between $17-$26
- Laryngoscope failure rates as high as 30-50% as a result of reprocessing
- Risk of cross-contamination resulting from poor cleaning or bacteria that remains following cleaning.
- Frequent loss of product and potential time delays in product availability
- Diminished light transfer over time that can lead to lower rates of first intubation success as compared to disposable metal blades.

Reprocessing Reusable Laryngoscopes

Soaking in a bin of chemicals
Brushing of blade and handle disassembly
Washing of blade and handles
Drying and transfer
Sterile Prep bagging & utilizing of sterile strips
Sterilisation of blade and handle
Testing
Transport from location of use to location of cleaning
Packaging and transport of blades back to location of use
Laryngoscope ready for use

$17-26 per intubation

The cost of

Flexicare single-use blades & handles solve the whole problem while improving performance and patient outcomes

The Problem...

The Solution...

BritePro Solo
The complete single-use laryngoscope system

Excellent Tissue Visualization from Advanced LED light
Increased illumination through high output LED delivers a bright focused light to where you need it most. Unlike reusable blades and handles that lose light after each cleaning, BritePro Solo is new every time, providing consistent focused light intensity without compromise.

One Size Fits All
The only handle your hospital needs. The ergonomic Solo handle features an over-moulded soft grip for superior control in all clinical settings. Unlike oversized standard handles that are built to accommodate the batteries, BritePro Solo is designed with only the comfort of the users in mind.

No Risk of Cross-Contamination
Designed for single use only, BritePro Solo laryngoscopes are 100% sterile and packaged individually, thus eliminating the risk of cross-contamination.

Quality Feel without Compromise
With 100% metal blades, BritePro Solo provides the quality and functionality of a reusable. Additionally, with a strong metal-to-metal connection between blade and handle, you can be confident that your tools will perform as well as you do.

Saving Life Economically
With the risks of cross-contamination from reusable devices rising, so too are the efforts and costs to reprocess the reusable laryngoscope blades and handles. BritePro Solo is more economical and provides better patient care as compared to reusables.

As it should be
BritePro Solo is a complete single-use fiber-optic laryngoscope solution comprised of an advanced LED Handle and a fully metal blade. This unique product is just as it should be, combining the best qualities of reusable laryngoscopes along with all of the benefits of a completely disposable solution.
